

Subcontractor Default Insurance

Customized risk services

As your trusted advisor, Liberty Mutual provides you with useful and experienced insights intended to create a successful subcontractor default insurance (SDI) program for the long term.

There are three phases to Liberty's customized risk services program:

1. Consult with customer —
understand your objectives and what you are hoping to get out of your program

2. Develop plan —
use your input to create strategies and determine which of our services will help you achieve your goals

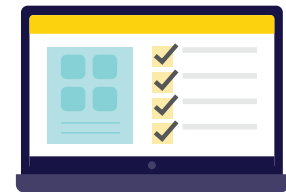

3. Execute services —
implement your plan with one or more of our five key services

Key service objectives

Site visits

- Provide hands-on feedback on project controls that are impactful to SDI.
- Transfer subcontractor risk mitigation tactics knowledge.
- Identify opportunities to be better prepared in the event of subcontractor default.

Subcontractor prequalification assessment

- Provide added resources to the customer to verify internal process compliance.
- Identify opportunities for improvement.
- Share best practices and consultative feedback.

Subcontractor default simulation

- Facilitate knowledge transfer to on-site staff.
- Familiarize on-site staff with sub defaults and SDI.
- Promote claims preparedness.
